

OM NIVRUTTI KSHIRSAGAR

MIS Executive | Data Analyst

Hadapsar, Pune, Maharashtra | 9373407041 | kshirsagarom77@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Detail-oriented professional with hands-on practice in Advanced Excel, SQL, and Power BI through self-built projects, and working knowledge of MIS reporting, data entry, and report generation. Comfortable analyzing datasets, building Pivot Table reports, and creating dashboards to convert raw data into clear, decision-ready business insights. Strong work ethic built over five years of independent, disciplined self-study; now focused on applying analytical and reporting skills in an entry-level MIS Executive, Back Office, or Data Analyst role.

SKILLS

MIS & Back Office: MIS Reporting, Report Generation, Data Entry, Data Management, MS Office (Excel, Word), Documentation, Data Validation

Excel: Pivot Tables, VLOOKUP/XLOOKUP, IF/SUMIF/COUNTIF, Charts, Conditional Formatting, Data Validation, Dashboard Creation

SQL: SELECT, WHERE, JOIN (INNER/LEFT), GROUP BY, ORDER BY, Aggregate Functions, CASE WHEN, Subqueries, NULL Handling

Power BI: Dashboard Development, Power Query, Slicers & Filters, Drill-Through, Basic DAX (CALCULATE, Time Intelligence)

Tools: Power BI Desktop, MS Office (Excel, Word), MySQL / PostgreSQL

PROJECT EXPERIENCE

Ecommerce Sales Analysis Dashboard · Power BI · [View](#)

June 2026

- Built an interactive Power BI dashboard with drill-through navigation, slicers, and filters across multiple linked tables
- Created DAX measures (CALCULATE, time intelligence) to track key sales KPIs and month-over-month growth

Sales Analysis Dashboard · Excel · [View](#)

June 2026

- Built an interactive Excel dashboard using Pivot Tables, Slicers, and dynamic charts to track retail, wholesale, territory, and brand-level sales performance
- Identified regional and brand-wise sales patterns, including top-performing brands and high-volatility daily sales trends

Customer Order Analysis · SQL – MySQL / PostgreSQL

Apr – May 2026

- Wrote multi-table SQL queries using JOIN, GROUP BY, and CASE WHEN to segment high-value customers
- Applied subqueries and NULL handling to clean and structure order data for accurate customer behavior reporting

Data Entry, Data Cleaning & MIS Reporting · Excel

May 2026

- Performed data entry, removed duplicates, filled data gaps, and standardized raw datasets to improve consistency and reliability
- Produced structured MIS reports and business review summaries to support faster, data-driven decision-making
